Information Security Policy

POLICY STATEMENT

Future Thinking has an established reputation for delivering high quality research and we believe that our quality processes need to be aligned with robust information security procedures. We are committed to preserving the Confidentiality, Integrity and Availability of all the information that we own, process or have access to in accordance with the MRS Code of Conduct, ESOMAR, Data Protection legislation, ISO 20252:2012 and the requirements of ISO 27001:2013.

We ensure that our Information Security Management System (ISMS) is supported by appropriate controls driven by a comprehensive risk assessment process. This Policy Statement represents all the information security policies we have developed within our ISMS and we ensure that these policies are known and understood across the organization. We have established the following objectives:

- To keep all confidential information within secure and protected systems;
- To train all our staff in the principles and practices of information security;
- To design an effective Information Classification system that all Future Thinking personnel adhere to;
- To ensure we work within a culture of information security at all times by conducting audits on a regular basis;
- To ensure that we continually improve our Information Security Management System by holding management reviews on a regular basis.

Signed and Dated

..... 8th May 2013

Jon Priest, Chief Executive Officer on behalf of OFT 2 LTD
